

## Sanitary Service Area Expansions

---

Environmental Programs administers, updates, and processes expansion applications for additions to County public water and sewer service areas. Environmental Programs prepares the staff report, present the report to the County Commissioners, and coordinates interagency review of the application with the Department of Public Works (DPW), the Enterprise Fund Controller, County Administration, the County Attorney and the Department of Development Review & Permitting (DRP).

Please contact Robert Mitchell, Director, at (410) 632-1220 x 1601 if you are considering applying for approval of a sanitary service area expansion.
